

Project Design Phase I Solution Architecture

Date	28 October 2022
Team ID	PNT2022TMID10699
Project name	Project-Real Time River Water Quality Monitoring And Control System
Maximum Marks	2 mks

Solution Architecture:

Solution architecture is a complex process — with many sub-processes — that bridges

the gap between business problems and technology solutions. Its goals are to:

- Find the best tech solution to solve existing business problems.
- Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders.
- Define features, development phases, and solution requirements.
- Provide specifications according to which the solution is defined, manage and delivered.
